Drive outcomes through social learning experiences

Meaningful learning is more than just videos and quizzes. Learners thrive when they collaborate, give feedback, and work together.

Peer review

Make learning more engaging and memorable with peer review, while saving the instructor's time.

Active discussions

Create async discussion activities to foster a sense of community & belonging between your learners.

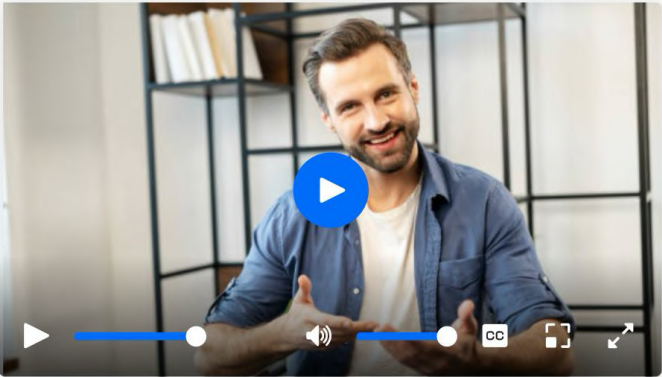

Group work

Most real work is done in groups. Eduflow gives you the functionality to facilitate this perfectly.

Create a Design System in Figma

[⚙ Settings](#)

To create design systems in [Figma](#), you need to follow a structured approach that involves **defining design principles, creating reusable components, establishing a consistent visual language, and documenting guidelines for usage**. Design systems in Figma serve as a centralized resource that ensures design consistency, efficiency, and scalability across projects. In this next section you will learn the 5 steps to creating design systems in Figma.

Create more engaging learning experiences

Here's a rich-text block with some great content. Unlike big L&D departments that support large organizations, micro-L&D teams need to leverage their limited resources more strategically.

If you're going to survive—and hopefully thrive—you need to be nimble, you need to be networked, and you need to be ruthless in

Secure your seat
